

Java Desktop Application Quiz 3

9/26/2024

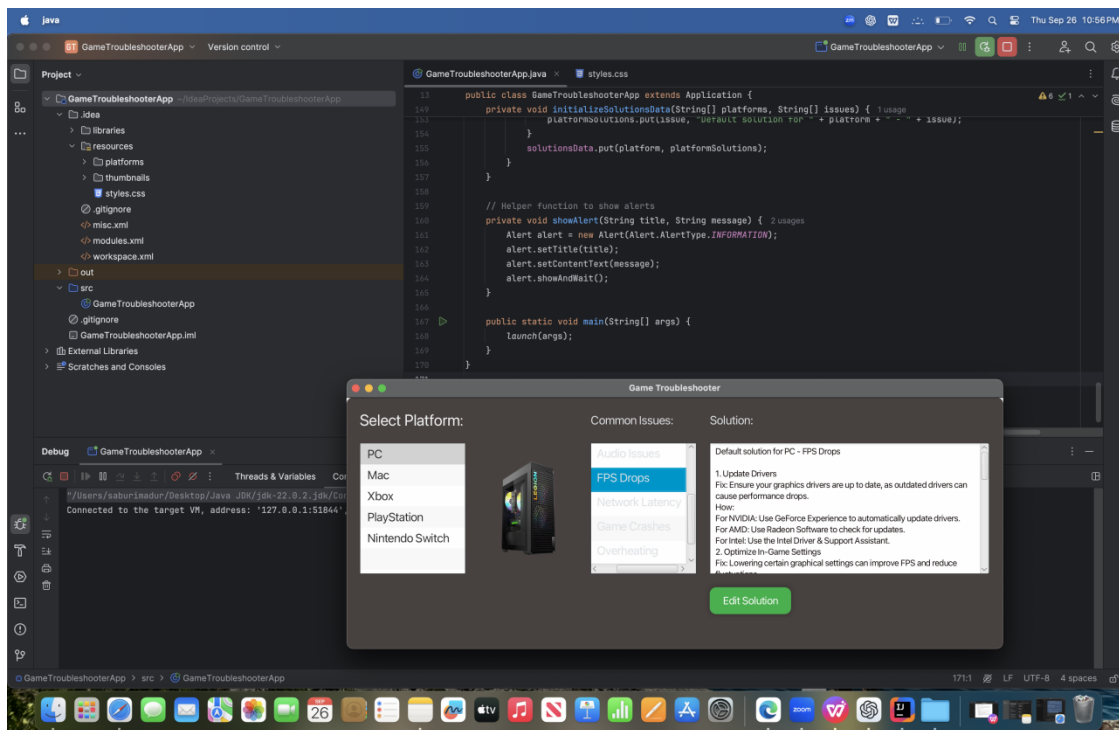

Create an enhanced JavaFX Application

Instructions:

Your task is to develop a well-improved **JavaFX application** that demonstrates your understanding of JavaFX features, UI design, and functionality. The application should meet the following requirements:

Grading Criteria:

- **Functionality:** How well the application works and meets the specified requirements.
- **UI/UX Design:** How visually appealing and user-friendly the application is, including the effective use of CSS and images.
- **Code Quality:** The organization, readability, and documentation of your code.
- **Bonus Features:** Any extra features implemented for enhanced interactivity, animations, or persistence.

All the best!
