Quiz 8

Class Assignment: Create a Fruit Grocery App Using .NET MAUI

Objective:

Create a simple grocery shopping app called "Fruit Grocery" that allows users to browse fruits, add them to a cart, and checkout.

Requirements:

1. Main Page

o Display a list of available fruits with images, names, prices, and an input field to select quantity.

o Provide an "Add to Cart" button for each fruit to add the selected quantity to the shopping cart.

o Include a "View Cart" button to navigate to the cart page.

2. Cart Page

o Show the total price of all items in the cart.

o Provide a "Checkout" button to navigate to the checkout page.

3. Checkout Page

o Create a checkout page with fields for name, address, city, and postal code.

o Provide a "Buy Now" button to simulate placing an order.

o Show a confirmation message upon successful order placement.
